Question 1
Complete
Mark 1.00 out
of 1.00

    Flag

question
```

```
Assume you have the following Angular app:
app.component.ts
      import { Component } from '@angular/core';
      @Component({
        selector: 'app-root',
        templateUrl: './app.component.html',
        styleUrls: ['./app.component.css']
      export class AppComponent {
         age=25;
and app.component.html
```

>

```
What statement should you implement in app.component.html @line2 to display the value of age (app.component.ts @line8)?
```

Select one: • a. {{age}}

- b. age
- c. ((age)) d. {age}
